Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 16, 2007 has been entered.

Response to Arguments

2. Applicant's arguments, see amendment, filed May 16, 2007, with respect to claim 12 have been fully considered and are persuasive. The **35 USC § 101** rejection of February 8, 2007 has been withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2622

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim **12** is rejected under 35 U.S.C. 102(e) as being anticipated by **Petrovic et al.** U.S. 6,737,957.

Considering claim **12**, **Petrovic et al.** discloses remote control signaling using audio watermarks. The system uses watermarking techniques to provide a hidden data channel in an audio signal for providing short messages, such as device activation commands, or remote control signals that can change the state of a device. (col. 2, lines 66 through col. 3, line 2) **Petrovic** teaches a remote control signal is hidden within an audio signal that is broadcast over *radio and TV*, stored on CDs, DVD, tape or computer memory, played over speakers and/or transmitted over other audio channels. Various devices such as toys, computers, and appliances, that are equipped with an appropriate detector, detect the hidden signal to trigger an action, or change a state of the device. The device action can be completely unrelated to the ongoing audio content, and it can have a number of different objectives, such as entertainment, education, sales, security, etc. (col. 2, lines 36-55) **Petrovic** also discloses a TV receiver 235 comprising a microphone 292, an extractor 294 corresponding to the claimed decoder that extracts the watermark signal to the controller 295. **Petrovic** further discloses a decoder 600 (See, fig.6; col. 9, lines 53-60). Thus, **Petrovic** discloses all claimed subject matter.

Allowable Subject Matter

5. Claims **1-11 and 13-22** remain allowable over the prior art.
